

CCAC MARCH 13, 2018 MEETING NOTICE

Rachel Bronson, PhD
President & CEO
Bulletin of the Atomic Scientists

“The Doomsday Clock: What it Says and Why it Matters”

Joining us only 3 weeks after the 2018 announcement setting the Doomsday Clock, Rachel Bronson, President & CEO, *Bulletin of the Atomic Scientists* will discuss the Clock's history, the current time and what it means for the future of the planet. The Doomsday Clock is a design that warns the public about how close we are to ending life on earth as we know it with dangerous technologies of our own making.

Each year the *Bulletin* sets its iconic Doomsday Clock and garners intense media attention and stimulates a global conversation reaching from within the walls of some of the most powerful quarters, to late night television shows and across social media platforms.

Given so much international uncertainty, this is a keynote speech not to be missed.
